GENAI APPLICATION OVERVIEW

PROMPT ENGINEERING CHEATSHEET

WHAT IS A PROMPT?

A prompt is how we talk to AI to get the output we want.

It is any instruction or input you give an AI model to tell it what you want.

This can take many forms:

- A question or a direct task
- A complex problem or statement
- A detailed set of instructions
- A role description (persona)
- Even a specific example

CORE TERMINOLOGY

Prompt:

The input text passed to the Large Language Model (LLM).

Completion:

The corresponding output generated by the model.

Inference:

The act/process of using the model to generate text.

Context Window:

The maximum amount of total input tokens (plus output tokens) that a language model can process at once.

THE LLM INFERENCE LIFECYCLE

Good Prompt = [Task] + [Persona] + [Context] + [Format] + [Exemplar] + [Tone]

Combined Elements = Maximized Control over Generative Output

THE PERFECT PROMPT FORMULA

[01] TASK

The specific action or objective you want the AI to achieve (e.g., "Write", summarize").

[02] PERSONA

The explicit role or professional identity the AI should adopt to frame its expertise.

[03] CONTEXT

Background details, user data, or surrounding circumstances that anchor the request.

[04] FORMAT

The visual layout or structural style required for output (e.g., Markdown table, bullet points).

[05] EXEMPLAR

Few-shot training examples embedded within the prompt to guide style and quality.

[06] TONE

The emotional or professional flavor of the text (e.g., casual authoritative, encouraging).

Notes:

.....

PROMPT TEMPLATE

I am working on **[context: briefly describe the situation, issue, department, audience, or purpose]**.

Act as a **[persona: policy advisor / communication specialist / senior analyst / administrative officer]**.

I need you to **[task: summarize / rewrite / compare / draft / analyze / prepare / simplify / improve]**.

Use the following information:

[input: paste text, notes, document excerpt, issue description, or data]

Please provide the output as **[format: bullet points / table / brief / email draft / checklist / action plan]**.

Use a **[tone: formal / simple / diplomatic / concise / professional / executive-level]** tone.

Follow this style or example, if useful:

[exemplar: paste sample wording, previous format, preferred structure, or example output]

Before giving the final answer, mention any **assumptions, missing information, risks, or points that should be verified**.

****

AI SAFETY CHECKLIST

Is AI suitable for this task?	
Have I removed confidential or personal information?	
Have I avoided sharing private investor or internal data?	
Have I verified important facts, dates, laws, policies, and procedures?	
Is the content clear, professional, and appropriate?	
Are assumptions clearly separated from facts?	
Could the content be biased, unfair, or misleading?	
Has a responsible person reviewed it before official use?	
Are required approvals completed?	
Is the final version safe to share?	

SIMPLE RULE

Use AI for drafting, summarizing, brainstorming, and organizing work.

Do not use AI as the final authority for official decisions, legal matters, policies, or confidential information.

AI BUSINESS VALUE MAPPING

The Board of Investment is planning an **Investor Summit**.

A) MARK THE ACTIVITIES

No.	Activity	Can AI Help?	Est. Time Without AI	Est. Time With AI
1	Research similar investor summits and best practices	☐	____	____
2	Identify target audience and stakeholders	☐	____	____
3	Prepare an event concept note	☐	____	____
4	Draft the full event proposal	☐	____	____
5	Create the event agenda	☐	____	____
6	Prepare a budget outline	☐	____	____
7	Create a presentation for senior management approval	☐	____	____
8	Draft invitation emails to investors and officials	☐	____	____
9	Create meeting notes and calendar descriptions	☐	____	____
10	Prepare social media posts or marketing captions	☐	____	____
11	Create infographic content for promotion	☐	____	____
12	Write a script for a promotional video	☐	____	____
13	Create website content for the event page	☐	____	____
14	Summarize feedback after the event	☐	____	____
15	Draft a post-event report	☐	____	____

Notes:

(B) IDENTIFY BUSINESS VALUE

Saves staff time		Supports faster decision-making	
Reduces repetitive manual work		Helps create professional marketing materials	
Improves document quality		Reduces delays in approvals and coordination	
Speeds up event planning		Helps officers focus on higher-value work	
Helps create better presentations		Improves consistency in official communication	
Improves communication with investors		Supports better follow-up after the event
